Training on Server & Storage Technology

Register/Enroll yourself by visiting or website: www.mitspl.com/Enquiry

About Us & the Vision:

MITSP is in the IT Infrastructure Services business since 1999. Our focus has always been on accepting the latest technology trends in the industry and work on those. It is this passion of ours which prompted us to develop a Training program on **Server Technology** so that all IT Software developers/ IT Hardware Professionals who want to upgrade their knowledge on the higher technology can benefit. We view this activity as our contribution to "Skill India" program launched by Govt. of India.

About the Server Training Program:

The training will cover all the Hardware aspects of a Server starting from the CPU to Disk Management, Memory Management, virtualization, Installation process & care.

Who must Attend:

Computer Hardware Engineers / System Support Engineers/ IT Software Developers with about 1-2 yrs experience in Maintenance of PCs, Laptops and Operating Systems having a desire to upgrade himself to higher technologies and contribute fruitfully in Data Centers or IT Infrastructure needs of their respective organizations.

This program is such designed that it will give immense benefit to System Admin/Network Admin professionals involved at Client sites.

Fresher's need not feel left out. Get back to us by registering yourself; we have a special module for you before putting you on to the Main Program.

Benefit:

1. You will understand the working of the hardware components installed in your Server /Data Centre much better.
2. You will be able to participate with your vendor proactively in working out a good solution for your Management.
3. PC/Laptop Engineers will be able to attend Server Calls with confidence.

Course Duration: 2/3 days. 8hrs per day.

Venue: The Program will be conducted in a very conducive environment. The venue will depend up on the number of registrations- Min Size of Class room to be around 12-15.

Faculty: Senior professionals from the Industry having long years of experience in Handling the technology.

Summing up: All participants will get a Certificate of Participation at the end of the training session.
